

Glow in the Dark Lava Lamp

Science Activity

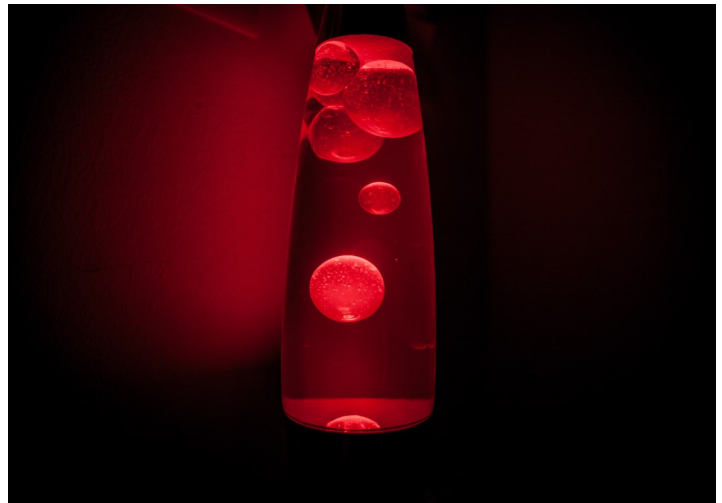

Glow in the Dark Lava lamp experiment is a fun science experiment to do with children. A great thing about this science experiment is that you only need a few supplies, and you will probably have these supplies in your home.

Mindful Notes:

Make sure children do not put the tablet in or near their mouth at any time.

Materials

- Jar/plastic bottle
- Vegetable oil
- Water
- Original Alka Seltzer tablet
- 2 Glow in the dark sticks

Instructions

1. Add 1 cup of vegetable oil into the bottle
2. Add 2/3 cup water into the jar - wait until the water has settled to the bottom
3. Crack and shake a glow stick to illuminate it
4. Cut the top of the glow stick (only to be done by adult)
5. Pour the contents of the glow stick in to the jar (do not mix or stir it)
6. Now for the fun part! Add the Alka Seltzer tablet to the jar.

Watch what happens!
